

Journal Mission

Cognitive Technology's mission is to provide a forum for scientific analysis of new developments that can assist or augment cognitive functioning – areas of research and development that range from perception, memory, comprehension, decision making, problem solving, and reasoning, and functioning that may occur at the individual or the group level. As one of the official journals of the Society for Applied Research in Memory and Cognition (www.sarmac.org), Cognitive Technology supports their mission by publishing high quality research applying our understanding cognition and by promoting the communication of this research within and between the applied and basic research communities.

Editorial Board
